Abstract:Inquiries from IEEE Microwave Theory and Techniques Society (MTT-S) members from October 16 to December 14, 2010, are presented. One member wanted current operations and procedures manuals of the MTT-S. The information on www.mtt.org by clicking on About MTT, then Governance Documents, was provided to him. One member wanted information on who to contact to have the new MTT-S periodical titled IEEE Transactions on Terahertz Science and Technology placed on the IEEE Web page. The information was provided and a request was placed to the IEEE to list the new MTT-S periodical on www.ieee.org. One member wanted to include IEEE Transactions on Nanotechnology to his 2011 membership. Contacting the IEEE or adding this periodical on www.ieee.org was suggested. One member was interested in the progress of the Baltimore 2011 IMS technical program.
