摘要: Each mode of a 2 km 50 mu m OM2 grade multimode fiber is precisely excited at multiple orientations using a binary phase spatial light modulator (SLM) to generate a detailed modal description of the fiber and minimize modal dispersion over 4.5 THz of optical bandwidth.
入藏号: WOS:000302549600001
语种: English
文献类型: Article
作者关键词: Adaptive optics; optical fiber communication; optical fiber dispersion; spatial light modulators
KeyWords Plus: CHROMATIC DISPERSION MEASUREMENT; HIGHER-ORDER MODES; OPTICAL FIBERS
