Abstract:The effect of multiphoton and tunnel ionization on the generation of terahertz radiation for optical breakdown in the focus of femtosecond bichromatic laser pulses is discussed.

Number of references:39

Inspec controlled terms:electric breakdown - optical pulse generation - photoionisation - terahertz wave generation

Uncontrolled terms:photoionization - terahertz radiation generation - optical breakdown plasma - multiphoton ionization - tunnel ionization - femtosecond bichromatic laser pulses

Inspec classification codes:A5280 Electric discharges - A4260F Laser beam modulation, pulsing and switching; mode locking and tuning - B2810D Dielectric breakdown and discharges - B2810E Gaseous insulation, breakdown and discharges - B2315 Gas discharges - B4330B Laser beam modulation, pulsing and switching; mode locking and tuning

Treatment:Practical (PRA)

Discipline:Physics (A); Electrical/Electronic engineering (B)
